Product Description

Product Description:

The selective pallet rack is composed of a set of selective pallet rack vertical frames, which are connected in various ways by horizontal beams, and provide storage for palletized or non-palletized products according to the rack configuration and the beam support used. Selective pallet rack is made up of pallet rack uprights and pallet rack beams and steel pallets typically sit on crossbars.

Our Product Introduction

Selective rack is designed for first-in, first-out inventory management, meaning that pallets are loaded and unloaded from the front of the rack. Double deep selective rack is also available for a last-in, first-out inventory management option. Selective rack enables direct access to all stored pallets or cartons without the need to move others, making it a highly selective solution where it is necessary to have direct access to a wide variety of products stored. However, numerous aisles are required to accommodate this high selectivity, making it a lower density option compared to other types of warehouse racking systems. The selective pallet rack can be integrated with conveyors and other types of storage racking such as carton flow racking to produce a pick module, which helps move product quickly through a warehouse or distribution center. Its main function within the pick module is to replenish picking areas.

Applications:

Product Application Occasions and Scenarios for the Qifei Heavy Duty Pallet Racking:

The Qifei Heavy Duty Pallet Racking is a rugged pallet storage system that is perfect for use in a variety of different warehouse and storage scenarios. This strong warehouse pallet rack is designed to provide a tough warehouse racking solution that can withstand the demands of heavy use and frequent loading and unloading. The Qifei Heavy Duty Pallet Racking is made in China and is certified by ISO9001, CE, and SGS. It has a minimum order quantity of 10 and its price is TBD. It comes in a standard export packaging and has a delivery time of 20 days after deposit. The payment terms are 30% deposit and 70% before delivery. The supply ability is 8000ton/year, and its size can be customized. It has 2-8 levels and is open-closed. Its package size is 1000.00cm * 1000.00cm * 1000.00cm. The Qifei Heavy Duty Pallet Racking is located in Nanjing, Jiangsu. The Qifei Heavy Duty Pallet Racking is perfect for a wide range of warehouse and storage applications. It is ideal for use in industrial settings, such as manufacturing plants, warehouses, and distribution centers. It can also be used in retail settings, such as large department stores and grocery stores, to store and organize inventory. The Qifei Heavy Duty Pallet Racking is also well-suited for use in storage facilities, such as self-storage units or commercial storage buildings. Its rugged construction and strong design make it a reliable and durable option for storing heavy items and materials. In addition to its use in traditional warehouse and storage settings, the Qifei Heavy Duty Pallet Racking can also be used in unique or specialized scenarios. For example, it can be used in greenhouses or other agricultural settings to store and organize plants and equipment. It can also be used in workshops or garages to store tools and machinery. Overall, the Qifei Heavy Duty Pallet Racking is a versatile, strong, and reliable storage solution that is capable of meeting the demands of a variety of different applications and scenarios.
